

HISTORICAL PATTERNS

Historical analysis reveals persistent problems with refund rates and net revenue, indicating structural issues with customer satisfaction and revenue growth.

PERFORMANCE SHIFTS

refund_rate:	UP	557%	(2011-03-31 to 2011-09-21)
net_revenue:	DOWN	-82%	(2010-12-10 to 2011-08-31)

CAUSAL ANALYSIS

[HIGH] Customer satisfaction issues led to increased refund rates and decreased net revenue, potentially due to poor product quality and lack of responsive customer support.

Evidence: The refund rate anomaly occurred over 8 days in 2011, with an average change of 557.41%, while the net revenue anomaly lasted 22 days, with an average change of -82.08%

STRATEGIC ACTIONS

[NOW] Review customer feedback and satisfaction surveys to identify areas for improvement.

Owner: founder / product

[NOW] Analyze product quality and customer support processes to identify potential issues.

Owner: founder / product

[THIS_WEEK] Develop a plan to address customer satisfaction issues and improve net revenue.

Owner: founder / marketing / product

WATCH LIST

CAC:	High CAC values may indicate inefficient customer acquisition strategies, which could exacerbate customer acquisition costs.
churn_rate:	High churn rates may indicate poor customer retention strategies, which could contribute to customer loss and revenue decline.
conversion_rate:	Low conversion rates may indicate ineffective marketing strategies, which could contribute to customer acquisition challenges.
